	Examiner Patricia Hightower	Art Unit 1711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Information Disclosure Statement

The information disclosure statement filed June 24, 2003 has been considered and has been made of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Feist et al (USP 6,715,200).

Feist et al (USP 6,715,200) disclose methods for forming data storage media and the media formed thereby comprises; injection molding a substrate comprising surface features, wherein said surface features having greater than about 90% of a surface wherein said data storage media has an axial displacement peak of less than about 500 micron under shock or vibration excitation. See abstract; col. 1, lines 25-67; cols. 3-6; cols. 7,10.

At col. 10, lines 1-67; the patentee teaches in theory, any plastic that exhibits appropriate properties and can be employed as the substrate, core and/or coating. However, the plastic should be capable of withstanding the

subsequent processing parameters (such as polyetherimides, polyimides, etc.).

See col. 10, lines 15-25,34-40,50,67; cols. 11-17; the examples; claims 1-22.

Claims 3-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vierk and Landin are cited to show the state of the art of internally damped rotatable storage article and plastic composite disc substrate.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia Hightower whose telephone number is (571) 272-1073. The examiner can normally be reached on M-F from 9:30 A.M. - 6:00 P.M.
